

Metadata for Dataset Distribution Specification

Version 2.4.0

ICTC approved

ICTC approved on 16 October 2024

Release notes

- Changing name to Metadata for Dataset Distribution Specification.
- New XML examples in Annex B.
- New Annex D explaining how to transition between versions of the specification for different uses of the metadata.
- Fixing of the issues identified in the standard-vetting interoperability (SV-IOP) test held in 2024.
- Full alignment with DCAT 3 and use of dcat:Dataset to provide the necessary metadata.
- Allowance of the usage of md:FullModel based metadata only for the purpose of transition and backwards compatibility.
- Deletion of the part that relates to exchange of power flow settings as this information is now published as part of the IEC 61970-457:2024.
- Providing information on how to use references to *Action* in the dataset metadata.
