

Common Information Model Expert Group

EIC: Area codes analysis. Focus on control blocks

Version 3.0
2 April 2021

ENTSO-E Secretariat

Preface

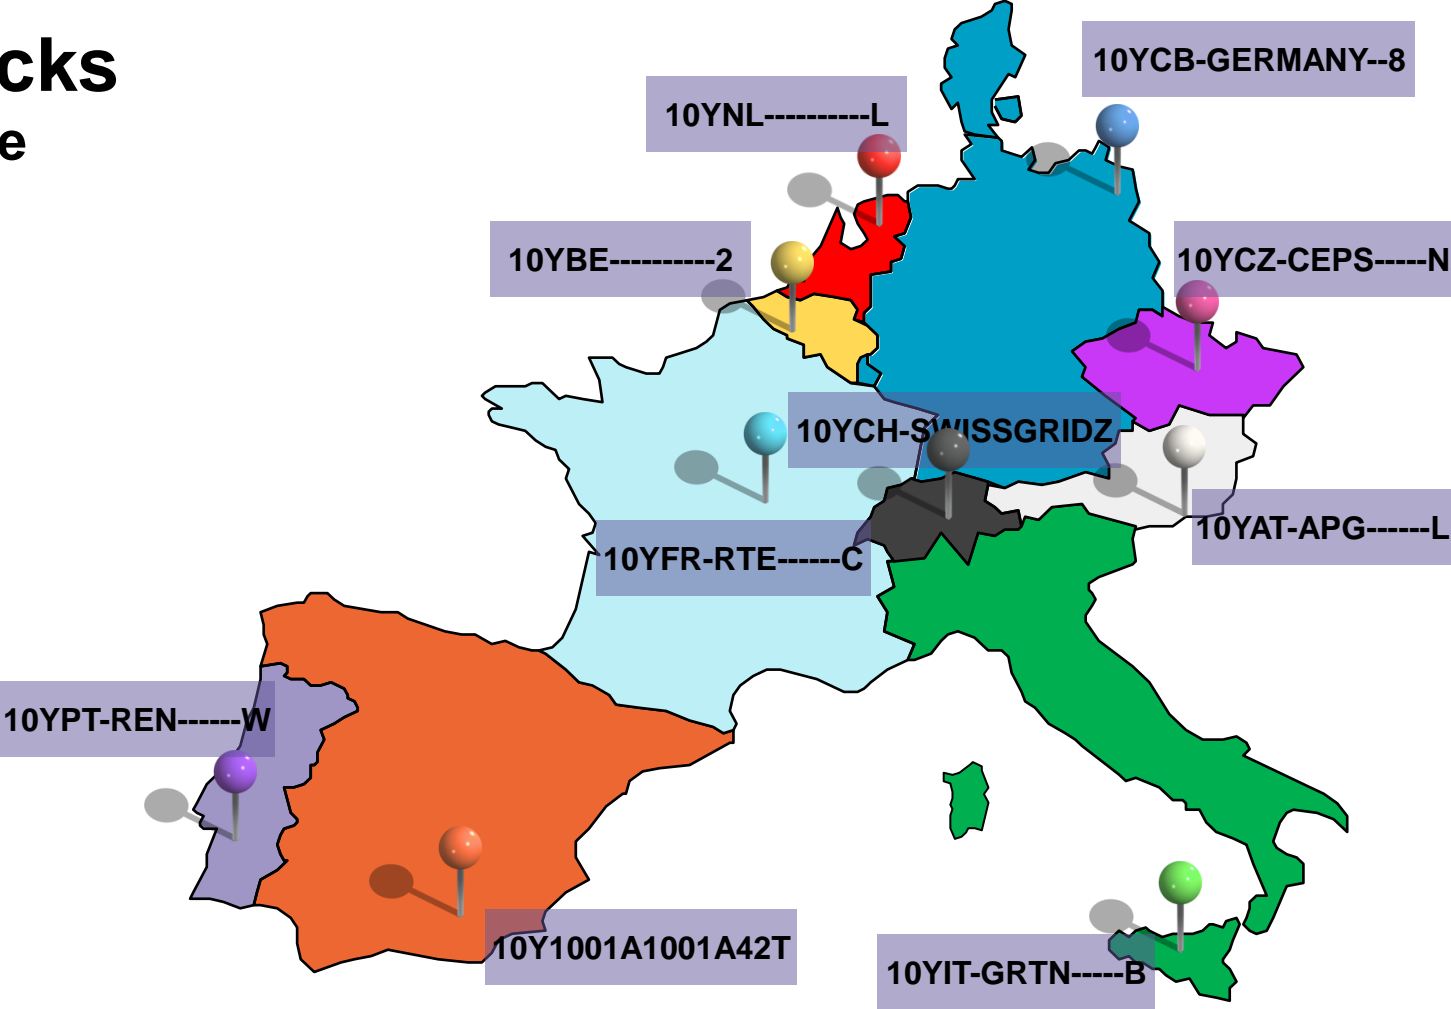

- The present analysis has been undertaken in collaboration with the European Electricity TSOs.
- The presentation illustrates Area-codes (Y-Codes) representing control blocks which are currently or in future in use within the European markets.
- The presentation does not display:
 - Y-Codes that are already displayed in the EIC map directly synchronized with CIO tool on ENTSO-E website: it includes Y-Codes representing member state, scheduling areas, control areas, market balance areas, bidding zones, synchronized areas.
 - Y-Codes which are currently used in the ENTSO-E RGCE (regional group continental Europe) settlement and accounting process.
- This list of Y-Codes can be subject to further updates in the future, e.g. depending on changes in area structures at national level.

Definitions

- **For the definitions of the different areas, one should refer to the last version of the Harmonised Role Model published on the ENTSO-E website.**
