

South-West Europe Capacity Calculation Region

Information on the ongoing projects in the Region

Long-term Capacity Calculation (LTCC)

Calculate the available long-term cross-zonal transmission capacities that can be allocated to the electricity market.

Go-live expected in 2026

Coordinated Security Analysis (CSA) - Regional Operational Security Coordination (ROSC)

Perform coordinated security analysis to assess the operational security of the transmission system and agree on the remedial actions needed to maintain it.

Go-live expected in 2027

Balancing Timeframe Capacity Calculation (BTCC)

Calculate the balancing timeframe cross-zonal transmission capacities for the exchange of balancing energy or for operating the imbalance netting process.

Go-live expected in 2028
