

CWE - CEE MERGER REPORTING TO MARKET STAKEHOLDER COMMITTEE

Zoltan GYULAY

Reminder: discussion and actions so far

The Steering Committee comprised of CEE and CWE representatives have agreed to use a coordinated flow based methodology (FBM) across both regions initially and ultimately merge the regions.

This is in line with the CCR proposal for

- two regions CWE and CEE
- a joint project plan for merger to be submitted to NRAs and ACER in March 2016

Strong co-operation between CWE and CEE TSOs

- CWE will provide CEE with detailed information on their FBM subject to agreement on the ENTSO-E NDA.

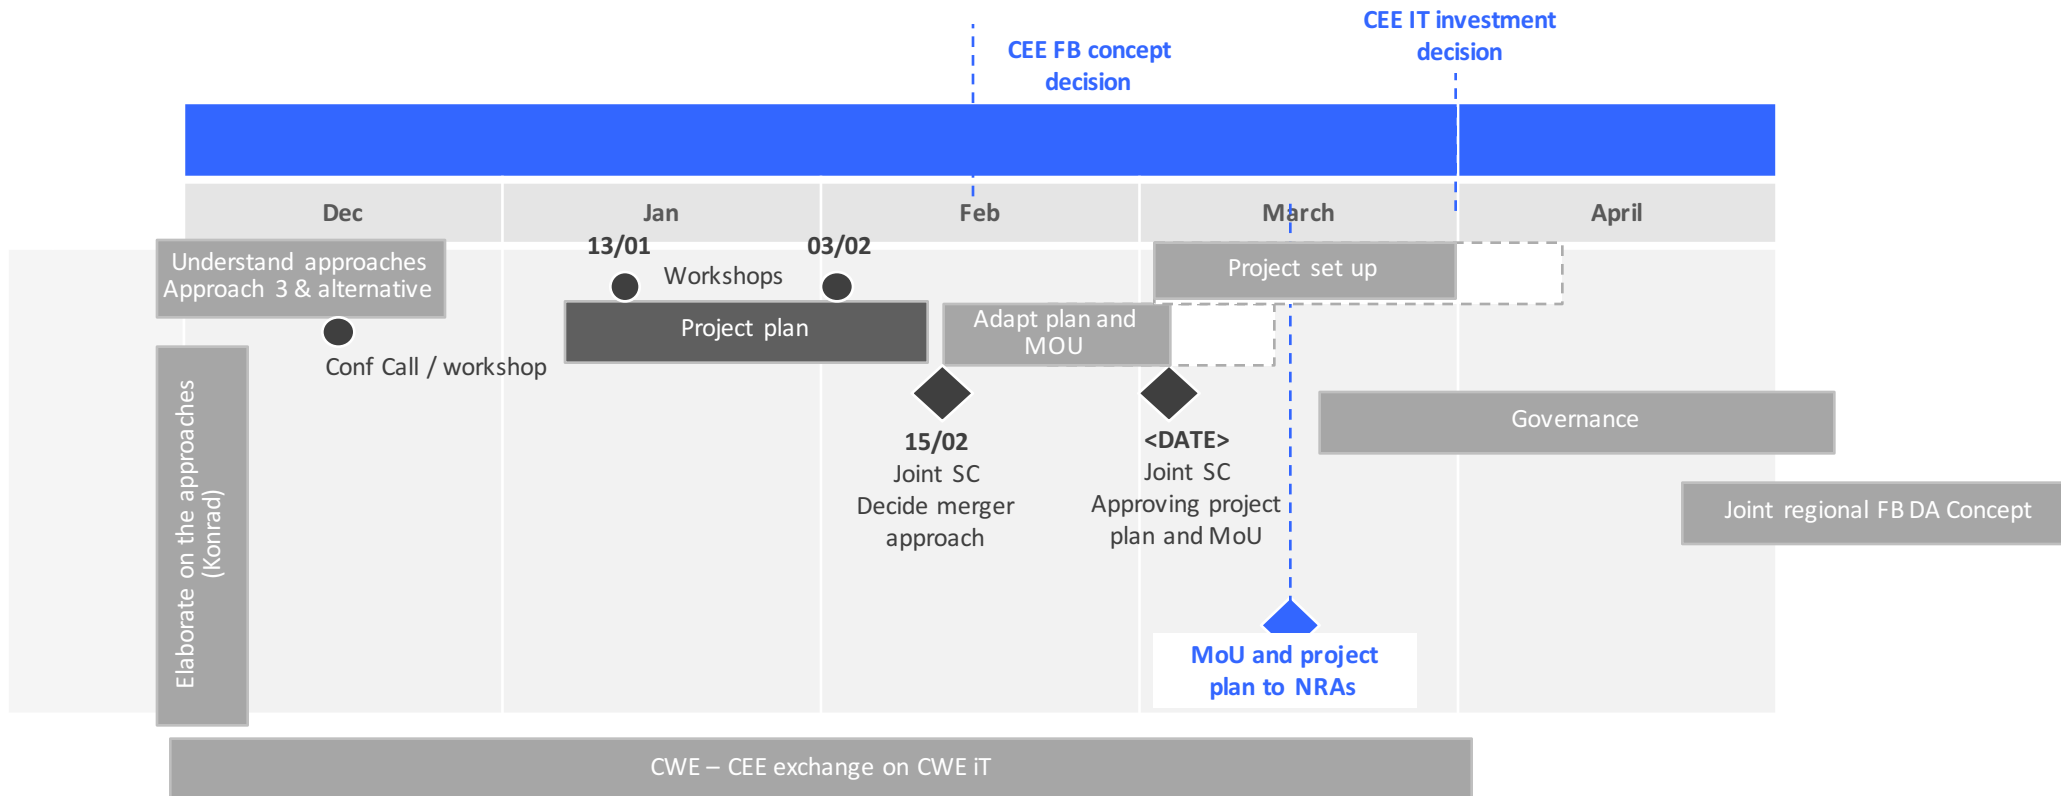

SC has agreed on an action plan to deliver a project plan to develop and implement a concept for coordinated CEE and CWE FB DA (see next slide)

- a challenging timeline
- dedicated meetings to expedite delivery

Action plan to deliver roadmap to NRAs by mid March

Target

- A project plan to design and implement a concept for a common FB DA methodology in the CEE and CWE regions
- Realistic and acceptable to all parties
- Taking into account milestones from CACM and ENTSO-e CCR proposal
- To be submitted to all NRAs of the regions and ACER
