

National Implementation of RfG – Wind Industry's perspective

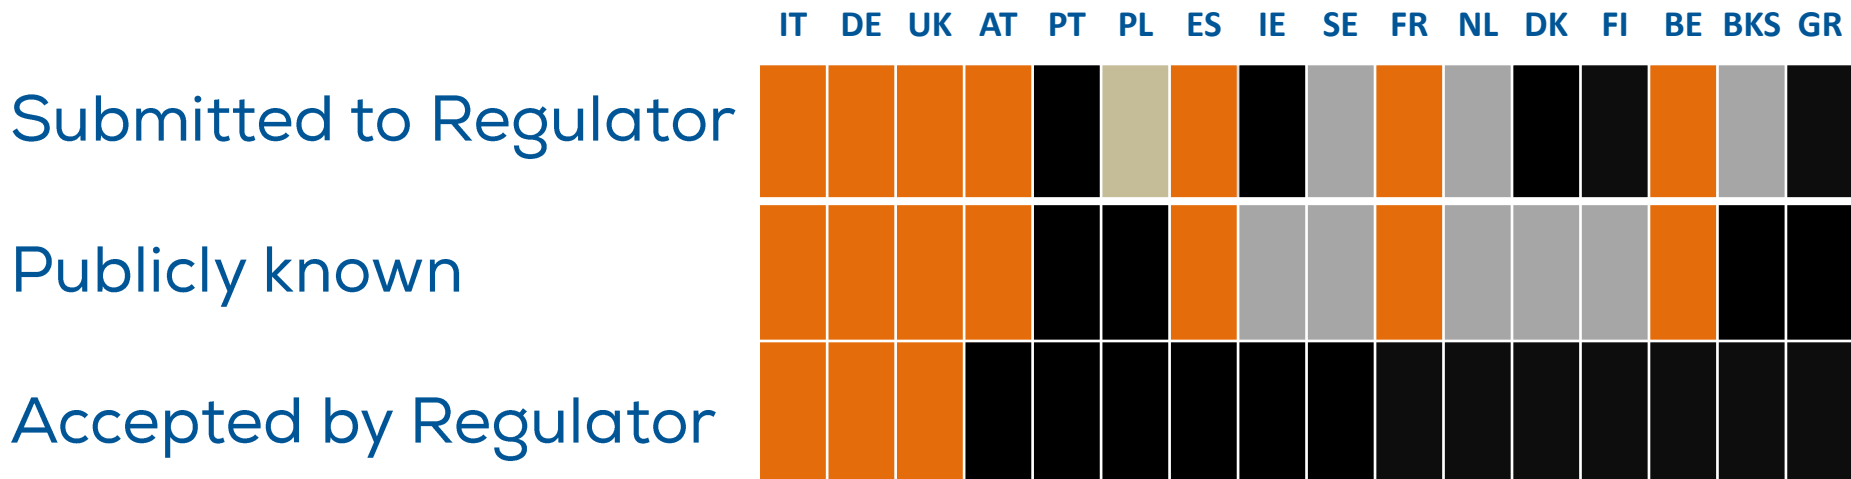

Daniel Fraile

Head of Market Intelligence

Disclaimer

- Information shown represents WindEurope's members knowledge until 18 November
- Information (partial) available for the 16 countries presented might deviate from reality: This also indicates sometime lack of clarity/ transparency in the current process

Status of the implementation proposal

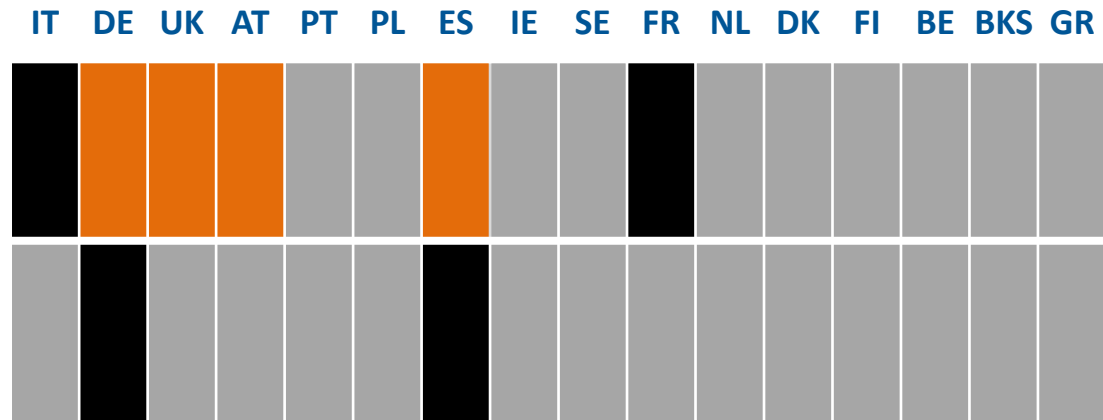

* Feedback from 16 countries

Certification/ validation process

New certification/
validation process

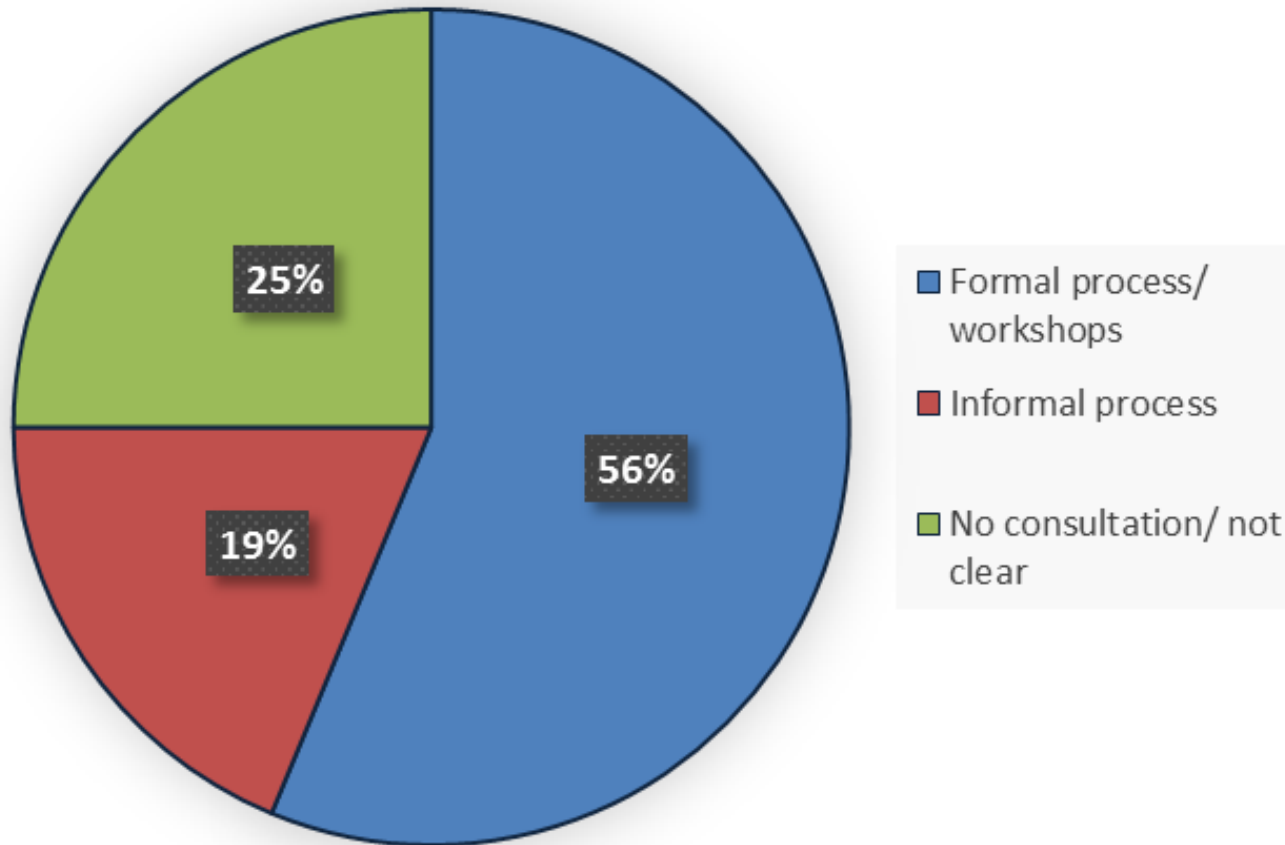

New process finalized

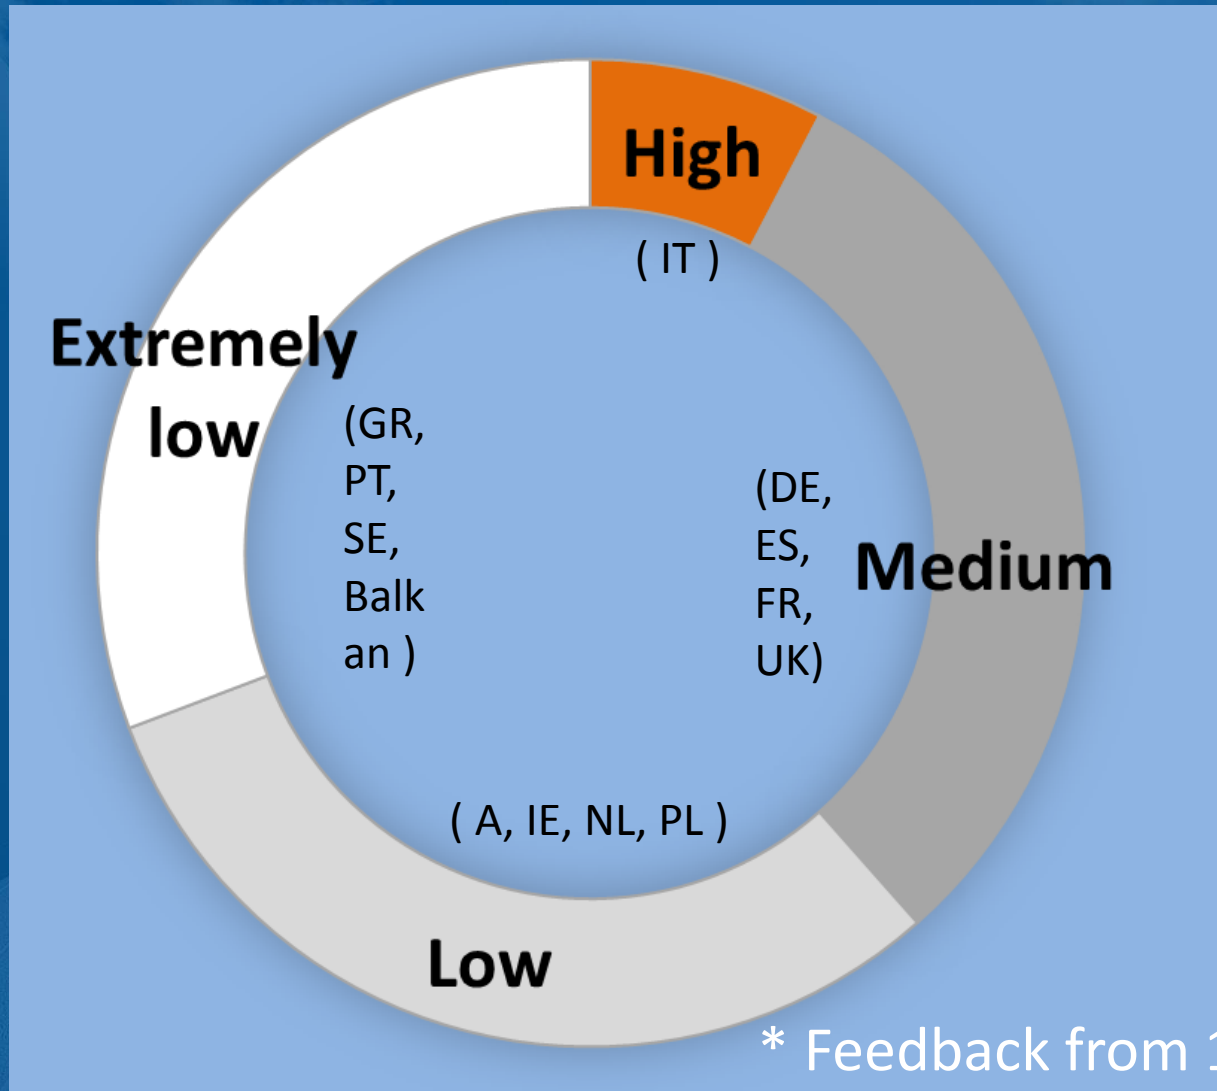

* Feedback from 16 countries

Stakeholders involvement in the RfG implementation at national level

Overall satisfaction with national implementation

Conclusions

- In > 50% of countries assessed → proposal not submitted/ not public
- In ≈ 50% countries assessed → formal consultation process
- Final technical requirements known only in 2 countries (since May, July 2018).

The following are not clear in most cases:

- **Which will be the final technical requirements?**
- **When will they be published?**
- **How will they be certified/ validated?**

So:

- **Will the original timeline for industry be kept or will derogations be accepted?**

THANK YOU
