

CACM implementation: return on experience

Market European Stakeholder Committee

8th June 2017, Brussels

CACM: effective and efficient implementation needs ambitious targets and reliable timings

Proposed methodologies: need to be ambitious

- Already submitted methodologies are the “lowest common denominator” → harmonization should not lead to a step back !
- ✓ E.g: cross-zonal intraday gate opening time at 22:00
- Step-wise approach is of course possible, but the interim target should also be more ambitious
- The aim should be to align the target at least on best practices

...and proper stakeholder involvement: no “faits-accomplis”!

Stakeholder involvement: stop faits-accomplis

- Stakeholders should be involved from the start of the project: and not only at the start and at the end:
 - ✓ When several options are on the table: foresee technical workshops with stakeholders to build the proposal
 - ✓ Inputs should be taken into account
 - ✓ Consultations open for one month with a finalized proposal is not optimal: limited room to build constructive target !
 - ✓ Eg: intraday capacity pricing methodology
- Take a good example of the balancing standard product discussion: the consultation will take place at the end of a fruitful stakeholder involvement process
