

## **Granularity of the products in DA and ID**

**Market European Stakeholder Committee**

6<sup>th</sup> September 2017, Brussels

# Small granularity products: how do we get there?

---

- Where do we go ?
  - ✓ Clean Energy Package : **granularity of the products in ID and DA should be aligned with the ISP**
- Where are we today ?
  - ✓ Trading with 15 min products in the Intraday Market is already possible in some countries (BE, NL, DE, ...) and at some borders, trading is allowed cross-border with products aligned with the current ISP (FR-DE, ...)
  - ✓ In addition, some countries have implemented local auctions in D-1, where products are aligned with the ISP (DE, ...)
- EURELECTRIC's questions :
  - ✓ What's the plan to reach the target ?
  - ✓ What are the lessons learned from the existing experiences? What is the appetite from the market?
  - ✓ Quick Wins identified ?
  - ✓ How does XBID fit with the target?
  - ✓ Is Euphemia able to manage 15 min products?
