

# State of play on the IDCZCP decision

- Number of IDAs
  - Most likely two: 15:00 + 22:00
- Obligatory IDA participation
  - Yes for 22:00
  - Yes for 15:00, but some TSOs may offer 0 capacity at IDCZGOT
- Governance
  - TSOs will have to update the common set of requirements for an efficient capacity allocation in SIDC
  - NEMOs should propose amendments to the algorithm methodology (and possibly products) accordingly:
    - In this proposal, NEMOs will propose implementation timeline for both IDAs
- XBID interruption
  - TSOs propose an interruption of maximum 45 min and at least 30 mins of CT for each delivery hour
  - Decision on interruption within the amended algorithm methodology
  - Disagreement among NRAs on whether internal trade should/can stop during IDAs
