

# NC ER update on ongoing activities

System Operation European Stakeholder Committee  
12 June 2018

---

# NC ER – ongoing activities

- April 2018 - internal ENTSO-E workshop with the aim to share among EU TSOs questions on NC ER implementation (eg. general rules how establish list of substations essential for system restoration)
- LFDD – procedure how to check amount of Demand to be disconnected taking into account all PGMs (including RES type A)
- Technical requirements for voice communication (article 41(3)) – draft under internal consultation within ENTSO-E
- Coordination of rules to suspend and restore market activities (draft) – to be presented during next SO ESC (Septemeber)
- Provisions for regional coordination (article 6) are under ENTSO-E RSC project.

# NC ER – Implementation schedule

- NC ER implementation in Y2018 is mainly national one
- National implementation schedule vary depends on country due to different needs per TSOs (eg. in article 11(4)(c) & article 23(4)(c) in one country is solved now in national legislation (including NRA approval), in other need to established)
- Each SO (TSO and/or DSO) can publish their implementation plan on voluntary basis or on NRA request
