RSC complexities and future challenges

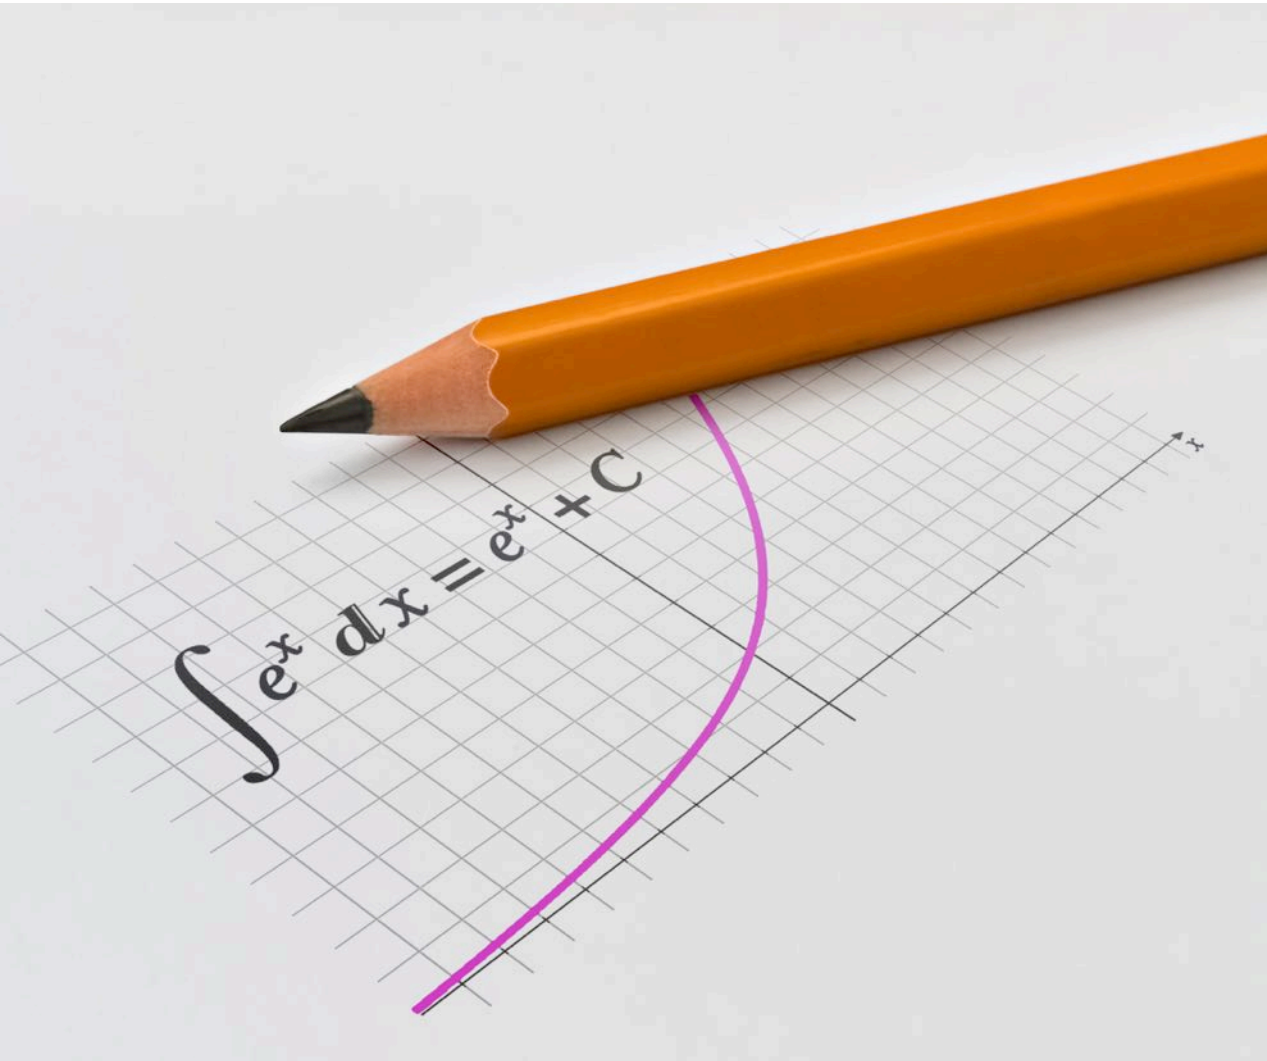

RSC Conference 2019, Copenhagen
Maik Neubauer, TSCNET Services

Starting with why...

“Why it is so complex
to just implement
the five mandatory
RSC services?”

Defining – (Business) Complexity

“A high **business complexity** is caused by tight regulatory timelines paired with interconnected stakeholders, information systems and organizational structures.

The complexity level increases nearly **e^xponentially** with the number of alignments with stakeholders and customers”

Forrester Research, Harvard Business Review

Regulatory Environment

The background of the slide features a European Union flag waving in the foreground on the left, with a blurred image of a classical building facade in the background. The text is overlaid on the right side of the slide in white boxes.

3rd Energy Package

EU Network Codes & Guidelines

ENTSO-E Security Plans for specific services

Clean Energy Package

Compliance with national regulation

More to come...

Stakeholders

TSO in Shareholder role

TSO in Customer role

ENTSO-E Association & Working Groups

EU Commission & Memberstates

National Regulators & ACER

Regional Forums & Power Market

Regional requirements and coordination

Turning methodologies into processes

TSOs/ENTSO-E as creators of methodologies

Assessment & approval process by NRAs

ACER involvement & guidance

Transposition of methodologies into processes

Prototyping & Experimentation needed

Basis for IT tools & industrial implementation

Supporting processes with efficient IT

Pan-European tools and platforms

Modern, reusable architecture

Interconnectivity between RSCs and ENTSO-E

24/7 availability & business continuity

All based on a central data model

IT & Data Security in focus

Organisational Capabilities of the RSCs...

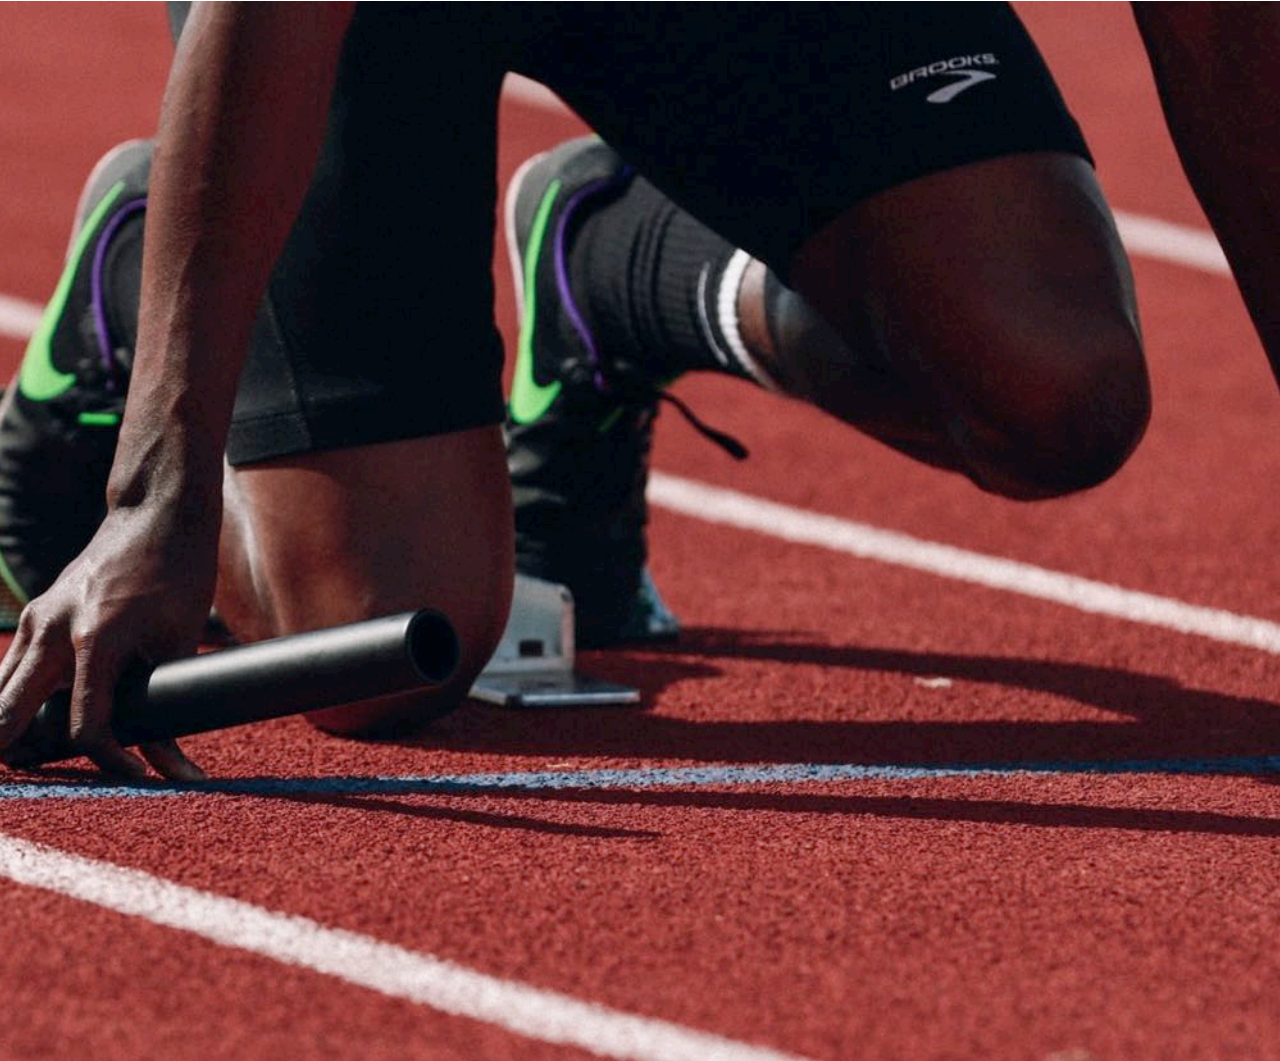

“We need this –
to fulfil all goals”

Organisational Capabilities of the RSCs

“But in some areas we are not that far yet, since we are stepping into unknown territory.”

Future Challenges

- Close communication and interaction with our stakeholders
- Common development of realistic goals
- Interregional cooperation
- Implementation of secure, reliable and future proof IT platforms
- Overengineering and simplification

The complexity in our business ...

... will continue to increase
in the coming years.

***We can only solve this
in close and trustful
cooperation.***

Thank you!
