REPORT ON PT IN / IGCC

Balancing Stakeholder Group

Brussels, 2017/06/07
GL EB – Imbalance Netting - Requirements

**IGCC** formally identified as starting point and is the implementation project

- **IGCC**
- **INC**
- **E-GCC**
- **not bound by legislation, but willing to implement**

**Status Quo**
- Implementation Framework
- Implementation Framework approval
- Appr.+6m
- Appr.+12m

**All TSO Platform**
- Appointment of entity
- Implementation of platform
- Appr.+6m
- Appr.+12m

---

Accession process to IGCC started.
Formally identified as starting point and is the implementation project.
Members of PT

Current situation

PT Member

- IGCC
- E-GCC
- INC
GL EB - Requirements

- Implementation Framework (consultation by stakeholders)
- Designation of entity (no consultation)
- Proposal of settlement for intended exchange (no consultation)
- Implementation and use of platform (no consultation)
Roadmap & Time plan

Roadmap

1. Implementation Framework is **agreed** by all TSOs
2. Implementation Framework is **approved** by all NRAs
3. **IGCC** is **adapted** accordingly if necessary to fulfil the Implementation Framework
   - IGCC MLA, algorithm and settlement is adapted by the current and expected member TSOs of IGCC
4. **IGCC fulfils all requirements** of the GL EB to the European platform for imbalance netting
5. **IGCC is the European platform for imbalance netting**
6. **All TSOs performing aFRR**, at least from Continental Europe, become Member of the European platform for imbalance netting having **signed** the **IGCC MLA**
7. TSOs are encouraged to join IGCC at an earlier stage, even before any amendments due to Implementation Framework have been implemented
Roadmap & Time plan

**Roadmap**

- Development of the implementation framework
- Implementation Framework agreed by all TSOs
- Adaption of the IGCC (MLA, algorithm, settlement)
- Content of the IGCC MLA is agreed by all Member TSOs, that fulfills the Implementation Framework
- IGCC is the European platform for the imbalance netting process
- IGCC fulfills all requirements from the GL EB

All TSOs performing aFRR, at least Continental Europe

Joining of IGCC can also be done in an earlier stage before implementation of any necessary amendment

Join European platform for the imbalance netting process by signing the IGCC MLA
Principles of the algorithm

• Proportional distribution
• Non discrimination

Each TSO calculates the Demand and the Limits of its LFC Area;
The Demands and Limits are sent to the imbalance netting process function;
The imbalance netting process function calculates the Corrections whilst respecting the Limits; and
The Corrections are sent to the TSOs and are used by them;
Thank You for your attention
