

Proclamation regarding pilot report towards the “Non-binding Community-wide Ten Year Network Development Plan”

1. Early 2011 the 3rd Legislative Package for the Internal Market in Electricity (3rd Package) will come into force in the national laws of the Member States. According to Regulation (EC) 714/2009 of the 3rd Package, “the ENTSO for Electricity should draw up, publish and regularly update a non-binding Community-wide Ten-Year Network Development Plan ...” (non-binding TYNDP).
2. In order to clearly show the TSO’s commitment to support the European goals (especially full integration of renewable energy sources as well as open grid access and usage for market participants in context of IEM establishment while maintaining the security of electricity supply) and to be optimally prepared on the regular delivering of this non-binding TYNDP, ENTSO-E decided to proactively release a pilot report on the non-binding TYNDP before the coming into force of the 3rd Package in the national laws of the Member States.
3. In order to involve all relevant stakeholders from the early beginning, a public consultation process also on the pilot report for the non-binding TYNDP was carried out from 1st March till 11th April 2010.
4. Based on the experience derived from realization of the pilot report for the nonbinding TYNDP, the future regular non-binding TYNDP will be based on more detailed analyses (technical and regulatory), more compatibility and more comprehensive coordination.
