

# UCTE Compliance Monitoring and Enforcement Process

Gerard Maas

Chairman of the UCTE Steering Committee

UCTE, 15 Boulevard Saint-Michel, 1040 Brussels, Belgium, [info@ucte.org](mailto:info@ucte.org)

# Why CMEP ?

- definition of security standards in the Operation Handbook implies a procedure to recurrently monitor their compliance
- this procedure will enable the implementation of preventive measures to ensure the highest level of security in the UCTE system
- this tool aims at strengthening the transparency and credibility of TSO's performance within the community as well as towards stakeholders

# UCTE security package

- Operation Handbook, CMEP and Multilateral Agreement will form a **comprehensive package** of complementary tools:
  - OH defining the standards
  - MLA-procedure in case of infringement
  - CMEP designed as a permanent preventive process

# Learning from the others' experience

- NERC (US blackout recommendations)
  - make the standards mandatory and enforceable
  - redefine responsibilities
  - strengthen the (existing) compliance process
  - track the implementation of the recommendations

# CMEP Processes

- compliance monitoring process = the process that monitors and measures system performance to ensure compliance with the standards of the Operation Handbook
- enforcement process = the process that evaluates the results of the compliance review and administers the distribution of non-compliance notifications
- compliance monitoring and enforcement activities are set to be run separately, but complementary

# The sequence of activities

- **STANDARDS:** establishing monitoring criteria
- **MONITORING:** evaluating performance related to standards
- **ENFORCEMENT:** ensuring compliance with standards

# The monitoring process will:

- define **compliance criteria / compliance levels** related to OH standards
- define the **frequency of the compliance process**
- define **monitoring procedure**: what information must be retained and presented
- define **competent bodies** responsible for the assessment

# The enforcement process will:

- encourage full compliance with the Operation Handbook standards
- be administered in a fair and transparent way
- recognize compliance and non-compliance
- evaluate severity and frequency/duration of non-compliance
- administer distribution of non-compliance notifications (no financial penalties)
- monitor measures for coming back to compliance

# Challenges: this process shall:

- be **agreed** by all TSOs
- be **supported** by the community and major stakeholders
- be implemented in the most **efficient** and **cost effective** manner and present results in an **understandable** and **transparent** way
- achieve **credibility** and **confidence** by stakeholders
- **enlighten** towards stakeholders structural issues non-solvable by TSOs
